Description

Description:

The 360° Revolution provides skin protection against the daily environmental challenges our skin faces and helps prevent the skin-ageing and damage these challenges can cause. It does this at a greater breadth and a higher level than previously possible, with products that have a skin-loving feel that encourage everyday use and that everyone concerned about skin-ageing and skin-health can incorporate into their daily skincare regime.

PROTECTION - against the complete spectrum of daily environmental challenges UVB, UVA, Infrared-A (IR-A) and visible light. Uniquely SPF50+ and broad spectrum UVB|UVA protection is combined with the Heliocare® 360° BioShield System of Fractional Biomimetic Melanin and Pro-Taurine providing additional advanced biological protection against high energy visible light and Infrared-A radiation. The BioShield System absorbs high energy visible light at the skin's surface and helps neutralise the action of infrared-A within the skin.

PREVENTION- of the damage the ROS/ free radicals generated by these daily challenges can cause using the clinically proven and patented Fernblock® Polypodium leucomos extract contained in every Heliocare product. Fernblock® is a natural complex containing powerful polyphenol anti-oxidants such as ferulic, caffeic and vanillic acid, supported by extensive peer review published evidence of it's high level skin anti-oxidant efficacy. In Heliocare 360° this is fortified with additional ferulic and caffeic acid to make Fernblock® FC, with an antioxidant activity up to 4x greater than Fernblock® alone. The Heliocare 360° antioxidant prevention effect is further enhanced by the addition of Vitamin C, E & Green tea extract.

REPAIR- of DNA damage. DNA in skin cells can be damaged by its absorption of UV and through oxidative stress caused by ROS, this can accelerate skin-ageing and impair skin-health, in the worst case leading to skin cancer. Fernblock®FC can help reduce DNA damage and natural plant-derived DNA repair enzyme ingredients in Heliocare® 360° can help reduce the level of DNA damage.

CARE- of the skin due to its silky smooth moisturising formulations that encourages every day use. The fluid cream, provides an advanced and Intense moisturising complex making it the ideal essential anti-ageing protect and prevent morning use product and the airgel is a light foaming mousse that provides smooth and even coverage and is ideal for those who don't require a high level of moisturisation and for reapplication during periods of high exposure.

Heliocare 360° fluid cream is an ultra-smooth, rapidly absorbed gel suitable for all skin types. It is non-comedogenic, paraben free, dermatologically tested. Delivered in sleek cosmetic packaging with a smooth dispensing nozzle it contains an advanced "fluid cream" skin hydrating and moisturising complex. Heliocare 360° fluid cream is ideal for daily morning use.

Directions:

Suitable for all skin types

Apply in the morning to complete your anti-ageing skincare regime. Gently massage until absorbed ensuring complete coverage of the face and décolleté. Non-comedogenic and water resistant reapply every 2-3 hours during periods of high sun exposure.
