Description

HemoFer is a dietary supplement made by the most important iron glycinate absorbed by the body. HemoFer also contains folic acid, based on the latest therapeutic recommendations.

To process any type of anemia, HemoFer also contains vitamin B2 involved in the formation of red blood cells, and vitamin C, exacerbating iron absorption.

HemoFer is produced as DRcaps, one of the most revolutionary forms of encapsulation, it passes intact through the stomach to prevent any gastric discomfort and delivers iron directly at the small intestine for maximum absorption.

Usage tips:

One capsule once a day, preferably 30 minutes before meals, or as directed by your doctor.

Concomitant use of other drugs:

Avoid taking calcium based supplements or dairy product 2 hours before or after taking the capsule.

Do not let the reach of children.

Store has away from light and moisture.
