Description

Description:

Belieema® Expert Intimate Wash with antimicrobial agent – gentle foaming cleanser washing gel with antimicrobial agent chlorhexidine which stops growth of bacteria and yeast. Bacteria and yeast are often cause of intimate infections. It has acidic pH and mild pleasant natural fragrance. Preparation with antimicrobial substance is intended on skin, for daily good hygiene and for removal of unpleasant feeling of itching, irritation and burning, possible unwanted odours caused due to everyday activities and sweating. Contains gentle & mild foaming substances, Hyaluronic acid (for better hydration), lactic acid, boric acid (to adjust pH to physiological level), vitamins E and B5 in form of pro?vitamin, Aloe vera extract with soothing properties and for suppressing itching sensations. In addition, the product contains special ??oligoglucans BioEcolia®, that as a pre?biotics help restore the natural micro?flora of the skin.

Belieema® Expert Intimate Wash reduces itching sensations and does not cause unwanted irritation. It returns a feeling of freshness and induces pleasant feeling.

Everyday long?term good hygiene and the use of suitable products helps to maintain the natural pH balance, contributes to the overall health and function of intimate body parts & vaginal mucosa and thus helps to significantly reduce recurrence of inflammation and yeast infections in intimate areas. Belieema® Expert Intimate Wash for skin application is recommended for the proper care and good hygiene during the occurrence of intimate infections and also suitable in cases of increased risk of

bacterial and yeast infection (during fitness, gyms, whirlpools, swimming pools, during long trips, business?trips away from home) and during menstruation or pregnancy and post partum.
