Description

Insect Ecran Infested Zones is a mosquito repellent product to apply on the skin. It protects you from mosquito bites for 8 hours. Containing DEET 50%, this repellent protects against insect bites in areas where they proliferate: lakes and streams, forests, marshes ... In addition, it is particularly effective against the mosquito *Aedes albopictus* (also called Tiger mosquito) vector of Dengue , Chikungunya and Zika .

In November 2014, Insect Ecran Infested Zones received the first AMM Biocide on the market of mosquito repellents in France (Marketing Authorization issued by the Ministry of Ecology, Sustainable Development and Energy). Furthermore, children from 2 years can use this mosquito repellent. Moreover, it is safe for pregnant women. However, pregnant women should apply to areas at risk of vector disease transmission.

Use:

Count 1 vial for 20 days, with 2 applications per day.
Do not exceed 2 applications per day.
