Description

ISISPHARMA Neotone Prevent is specifically developed for skin types subject to pigmented spots and pregnant / lactating women. It offers a lightening action and prevents the appearance of brown spots, especially the extended hormonal brown spots. Its optimal combination of 100% solar filters combined to specific active ingredients ensure a maximal tolerance and protect the skin from sun rays and blue light. Moreover, its universal tint with velvety texture adapts perfectly to all skin tones, for a natural and uniform skin complexion and moisturized skin.

Benefits:

- Unique¹ tinted and protective cream to prevent pigmented spots
- Lightening action
- 100% mineral solar filters
- Specific active ingredients for protection against blue light
- Formula specifically developed for pregnant and lactating women

Use:

Apply ISISPHARMA Neotone Prevent daily in the morning, on clean skin, over the whole face, neck and neckline.
