Description

Description:

Ketopan Foam combines an anti-seborrheic action with soothing and restructuring properties.

Formulated with Climbazole, Piroctone Olamine and Zinc PCA gently cleans, controls and prevents the cutaneous manifestations associated with seborrheic states.

Its formula is also enriched with a lipid mixture of ceramides, Cholesterol, Linoleate and Palmitate, to promote and reinforce the cohesion of the damaged corneal layer. **Indications:**

Ketopan Foam is indicated for the cleaning, control and prevention of seborrheic states, on the face and body, in its multiple presentations.

It may be used in adults and adolescents. **Use:**

Apply Ketopan foam to the affected area, previously wet, and massage gently.

Leave on for 1 minute and rinse thoroughly.

may be used daily, alone or as an adjuvant in the treatment of seborrheic dermatitis.
