Description

Description:

Epidermal changes: skin irritations, dry patches, chapped skin, after dermatological procedures. Cicaplast accelerates reconstruction of the skin barrier thanks to a formula that combines:

A copper/zinc/manganese mineral complex to stimulate the production of new cells,

Madecassoside to encourage proper cell organisation and procure fast, high-quality epidermal repair,

Its insulating texture is enriched in anti-bacterial agents to protect the skin. Invisible and non sticky, with easy spreading. This soothing, moisturizing treatment relieves itchiness and tight sensations.

The epidermis is soothed, protected and stimulated, and it is reconstructed more quickly (Due to the active ingredient). Paraben-free formula.

Use:

After dermatological procedures: follow your dermatologist's recommendations > Irritated skin, dry patches: twice a day > Chapped skin: 3 times a day > For all applications: twice a day
