Description

Description:

Traditional colouring products containing ammonia and peroxide can devitalise the hair. Without appropriate care, the hair scales quickly lift, resulting in loss of pigments. Colour shine is dull and fades. Your hair feels dry and rough.

With its creamy texture, this hair conditioner nourishes hair without weighing it down, colour radiance is protected and prolonged. With a delicate floral fragrance, enriched with camellia oil, which is highly concentrated in Omega 6, combined with botanical antioxidants, your colour is enhanced, remaining vibrant for longer.

Use:

After Shampoo, remove excess water then spread over the hair lengths and ends. Leave for a few minutes, emulsify by adding water gradually then rinse. In case of contact with eyes, rinse abundantly.
