Description

Description:

Due to chemical treatments including colouring, bleaching and highlighting, or frequent hair styling such as blow-drying and straightening, the internal structure of your hair is damaged and lacks essential elements.

Damaged hair is rough, dull.

Deeply damaged hair is brittle, split, porous, devitalized, very dry.

With its highly concentrated formula, the ultra-regenerating silicone-free conditioner enriched with plant-based keratin and tamarind seed extract known to have the same properties as hyaluronic acid, repairs and regenerates hair without weighing it down. Its creamy texture with a botanical fruity fragrance instantly envelops the fibre, repairs and restructures the hair leaving it regenerated, soft and silky.

Use:

After shampoo, remove excess water then spread conditioner over the lengths and ends. Leave for a few minutes, emulsify by adding water gradually then rinse. In case of contact with eyes, rinse abundantly.
