### Description

**Description:**

For men with long beards: beard oil tames, conditions and strengthens facial hair, whatever long beard style you have, without leaving your beard or skin feeling greasy.

For skin underneath: Gentle formula soothes itchiness and discomfort.

No silicone, parabens, or colourants, and made without any ingredients derived from animals.

**Use:**

Use the beard oil every morning on your long beard:

1. Dispense desired amount of skin & beard oil into your palm (2 to 3 drops, depending on your beard length) and rub hands together to emulsify.
2. Massage product evenly into facial hair, so BarberClub Long Beard & Skin Oil makes contact with skin underneath. For an even more tamed beard, use a brush or comb.

3. Wash your hands after application.
