Description

Description:

NITRO-TECH® is a scientifically engineered whey isolate lean muscle builder formula designed for all athletes who are looking for more muscle, more strength and better performance.

NITRO-TECH® contains protein sourced primarily from whey protein isolate - one of the cleanest and purest protein sources available to athletes.

NITRO-TECH® is also enhanced with the most studied Rapid post-workout amino acid delivery.

In addition to its the key musclebuilding ingredients, NITRO-TECH® is the first protein to contain all three key free-form amino acids (alanine, glycine and taurine) and is designed to deliver essential amino acids and proteinogenic (protein building) amino acids that are quickly digested and absorbed by your bloodstream -

aiding in muscle cell repair and growth and helping make NITRO-TECH® the perfect choice for rapid post-workout amino acid delivery.

Alanine is the second-most widely used amino acid in protein synthesis after leucine and is the primary amino acid for the production of usable glucose during intense training. Experts believe that supplementing with alanine post-workout can help combat muscle breakdown and promote protein synthesis.

Use:

Mix 1 serving with 4 to 6 oz. or mix 2 servings with 8 to 12 oz. of cold water or skim milk in a glass or shaker cup.

Use between major meals and after exercise. Drink 8 to 10 glasses of water daily.

For maximum results, consume 4 scoops of Nitro-Tech daily for a minimum of six weeks.
