Description

Description:

Mycogel is a foaming cleansing gel specially developed for sensitive skin suffering from irritation, redness and flaking, especially in oily areas (forehead, chin, eyebrows, wings of the nose). Mycogel's mild washing base guarantees gentle cleansing and respects the skin's natural balance without drying it. Thanks to the combined efficacy of copper, zinc and tea tree oil, mycogel limits the proliferation of the micro-organisms responsible for irritation and soothes any discomfort. The skin is clean, clear and soothed.

Use:

- Scalp: use as a shampoo 2 or 3 times a week on wet hair. Massage gently, leave for a few moments then rinse off.
- Face and body: Use once or twice a day on damp skin. Work into a lather then rinse off. Avoid contact with the eyes.
- Proper daily hygiene limits the frequent relapses.
