### Description

**Description:**

Say Yes to Dairy is a maximum strength digestive aid designed for temporary relief from the discomforts of lactose intolerance following dairy food consumption. Each chewable tablet supplies highly active lactase enzyme in a delicious French vanilla base. Even if you consume the healthiest diet imaginable, there can be no transfer of nutrients to the cells of your body unless food in the digestive tract is broken down properly. That requires the action of enzymes.

Gluten free

**Use:**

As a dietary supplement, chew one tablet immediately before or after a meal consisting of dairy food. Designed as a digestive aid to manage the discomfort of stomach distress which occurs soon after consuming milk or other dairy products.
