Description

**Description:**

Heat therapy is clinically-proven to relieve neck & shoulder aches and pains. NeckHeat is designed to be "split-able" so that you can use it exactly where you need it most.

As skin at the neck & shoulder area tends to be more sensitive, we have calibrated NeckHeat to release a slightly less heat as compared to MenstruHeat.

Heat therapy is clinically proven to relieve neck and shoulder pains. Neck heat is designed to produce an optimum level of heat to relax the tension in your neck and shoulders.

**Features:**

-Fast & Effective:

Provides quick relief as it heats up to a therapeutic temperature

-Comfortable Design:

Can be split into 2 pieces for targeted relief

-Odorless:

Perfect to use in the office & goes well with your favorite perfume

-Soft on Skin:

Medical grade adhesive for maximum comfort

-Long Lasting:

For all-day relief using 100% natural heat

**Benefits:**

-Starts heating up within 5 minutes for quick relief.

-Convenient to use anytime of the day, lasts 12 hrs

-Designed to fit for maximum comfort

**How to use:**

1. Tear open packaging. Upon contact with air, Neckuheat will heat up on its own.
2. Peel and paste onto your neck and/or shoulders according to your preference of heat level.
3. After every hour of use, remove product for at least 5 mins to let your skin rest. Prolonged contact with low heat may cause burns.

**Do not use**

-directly on skin while sleeping

-with a tight waist band/belt or apply strong pressure on product

-if product is torn or damaged, or if contacts leak

-on areas around wounds, rashes, damaged skin, face, where medication or other forms of heat have been applied

-on people unable to follow all use instructions or remove the product

-while undergoing any MRI OR X-ray procedures

-in microwave, attempt to reheat or place near heating elements as product may catch fire
