Description

Description:

Noviderm Melatrio Intensive Depigmenting Skincare fades existing brown spots and Limits the appearance of new spots.

Features:

Instantly and long-lastingly moisturises thanks to glycerine and beeswax.

Fades brown spots thanks to the gentle exfoliating action of the prolonged release AHAs combined with AHAs.

Prevents the appearance of new spots by restricting the formation of melanin and its transfer into the epidermis thanks to a patented whitening active ingredient with eco-certification, containing a cyclo-ceramide, vitamin C derivative and quinoa peptides.

Soothes and restructures the skin thanks to quinoa peptides.

Ideal for relaying a laser treatment session.

Hypoallergenic, non comedogenic

Alcohol, essential oils, silicones, phthalates and paraben free

Use:

Apply morning and evening to your face (avoiding the eye contour), hands and/or décolleté, ideally for 3 months for optimum results. If stinging or irritation occurs when the product is applied, space out applications or stop using it and seek advice from your dermatologist or pharmacist.
