### Description

**Description:**

For all skin types

Nuxe Nuxellence Eclat, the formula of this anti-aging fluid holds 10 patents. With Passion Flower and Hyaluronic Acid, it targets the core of skin cells to help them maintain optimum energy levels. Skin is luminous and appears younger. Enriched with pigment correctors, the fluid immediately illuminates skin.

No parabens. Non-comedogenic.

**Use:**

The ESSENTIAL step: Apply Nuxellence® Eclat every morning to recharge your skin and restore all of its youthful radiance.

Pump two or three times to obtain enough product for the entire face and neck. Gently warm the product on the tips of your fingers. Apply to the face, starting in the centre and smoothing outwards and upwards. Its light texture is quickly absorbed, so you can apply your additional skincare product straight afterwards.

For normal to combination skin, Nuxellence® Eclat can be used alone. For dry and very dry skin, apply Nuxellence® Eclat before a moisturising cream
