Description

Description:

PCA Skin Pigment Gel diminishes hyperpigmentation and prevents future damage to encourage an even skin tone. The combination of hydroquinone and AHAs help refine and improve your complexion over time. Lactic acid gently exfoliates dead skin cells while potent antioxidants neutralize free radicals to protect your skin from premature aging.

Directions:

After cleansing, spot treat with a thin layer and allow to penetrate. Follow with the appropriate PCA Skin broad spectrum SPF product in the daytime and moisturizer in the evening.
