Description

Description:

PCA Skin Acne Cream clears away blemishes and prevents future acne from forming by purifying your pores. This formula features liquid benzoyl peroxide, an antibacterial ingredient that controls acne by killing the cause of inflammation. Lactic acid gently exfoliates your skin to diminish surface cell buildup and breakouts, plus it replenishes moisture so you don't have to worry about patches of dry, flaky skin. Skin is left looking even and feeling soothed.

Key Ingredients:

PCA Skin Acne Cream

5% Benzoyl Peroxide: eliminates existing acne lesions and prevents future breakouts

Lactic Acid: supplies skin with necessary moisture

Tea Tree Leaf Oil: a natural antiseptic that promotes a clear complexion

Directions:

After cleansing, spot-treat with a smooth layer. It is not for all-over facial use. Follow with the appropriate PCA Skin broad spectrum SPF product in the daytime and light hydrator in the evening.
