Description

Do you need to cut your medicines to comply with your treatment? Do you find it difficult to swallow large pills? Do you find it difficult to cut small pills?

The PILBOX Cutter is the solution: practical, accurate and easy to use.

User Profile:

- Patients who need to cut their medicines according to their treatment.
- Patients who find it difficult to swallow large pills.
- Patients who find it difficult to hold and cut small pills.

The advantages:

- Accurate and easy to use: the pill is split by closing the box. There is no need to centre the pill that you want to split, the “pusher” directs it precisely to the centre of the cutting surface for a clean cut.
- Safety: the blade is inaccessible, and hence does not come in contact with fingers. Helps to split pills while avoiding the risk of getting cut thanks to its safe system.
- 2 in 1: Splits and Stores. The unconsumed part can be kept in the storage compartment.
- Small, light and safe, the Pilbox Cutter can be kept in your pocket or in your bag. Its modular design can be integrated into the Pilbox Liberty case by positioning all the daily modules on their side.
- Available in 4 colours: blue, orange, beige and green

Cutter size:

10.7 x 2.5 x 2.1 cm
