Description

**Description:**

Lactibiane Imedia is composed of 4 microbiotic strains that helps to quickly relieve symptoms of diarrhea dosed at 30 billion per orodispersible stick:

- > Bifidobacterium longum LA101,
- > Lactobacillus helveticus LA102,
- > Lactococcus lactis LA103,
- > Streptococcus thermophilus LA104.

The orodispersible powder of the stick dissolves immediately in the mouth for a quick setting and without water.

The microbiotic strains of Lactibiane Imedia, selected by PiLeJe, are listed in the National Collection of Cultures of Microorganisms (CNCM).

**Use:**

1 orodispersible stick per day. Use without water.

**Duration of the supplementation:** 4 days.
