Description

Description: Pregnazon Tablets are specially formulated and carefully balanced to provide the recommended daily intake of Folic Acid (400ug) along with 22 other beneficial nutrients which offer optimum nutritional support for all pregnancy stages and early motherhood. Pregnazon® is an ideal supplement from pre-conception through pregnancy and breastfeeding.

Pregnazon Tablets may be of benefit to;

Pregnazon Tablets

Women who are preparing for a pregnancy

Women who are already pregnant (at any stage of the 40 week pregnancy cycle)

Women who have just given birth

Women who are breast-feeding

When should I take Pregnazon Tablets?

Pregnazon Tablets should be taken as a pre- and post-natal vitamin and mineral supplement. It is ideal from pre-conception up until the end of your breast-feeding period. Start taking Pregnazon Tablets even before conception (if possible), as it is high in Folic Acid, Iron, Vitamin B12 and Zinc, which may help with complications due to vitamin and mineral deficiencies and ensures proper neural tube development and cell division. Continue throughout the gestation and the breast-feeding period to help supply the extra nutrients needed for the mother and the growing baby.

Use: One Pregnazon Tablet daily with a main meal.
