Description

Many people with Lactose intolerance are unable to fully digest the lactose (a sugar) in dairy products. As a result, they suffer from discomfort such as diarrhea, gas and bloating after eating or drinking dairy products. A deficiency of lactase (an enzyme produced in the small intestine) is usually responsible for lactose intolerance.

Provida Lactose Support is an advanced formula containing lactase in addition to other essential enzymes that supports the digestion of dairy sugars, proteins as well as fats, and help prevent the discomforts associated with lactose intolerance.

Features:

- No preservatives and coloring agents
- Free from sugar, sodium and potassium
- Gluten free
- Suitable for vegans as well as vegetarians

Provida Lactose Support

Use:

Take one or two capsules of Provida Lactose Support daily with any beverage, preferably before meals.
