Description

Description:

This SPF15 hand cream combines Micro-Collagen Vectorized, Patent Resultime *, targeted assets and sunscreens to offer 5 anti-aging actions: nutrition, de-wrinkling, firming, anti-stain and protection against external aggressions (UV, pollution, cold, limestone ...). Its ideal texture penetrates instantly, leaving no sticky finish, and resists friction.

Immediately, the hands are intensely nourished and protected from external aggressions. Day after day, the skin is de-wrinkled and firmer.

Use:

Apply the hand cream daily by gently massaging and emphasizing the contour of the nails. Renew the application if necessary.

Tips for preserving the youthfulness of your hands: use a mild soap to wash your hands. Avoid the misuse of hydroalcoholic gels that can dry out the skin.

Remember to protect your hands when using detergents.
