### Description

**Description:**

Saugella Natural Antiseptic is a soap-free emulsion, enriched in natural extracts of thyme and sage which helps to fight the inconveniences of the everyday life in particular during the pregnancy, during menstruation, after the childbirth, in the situations of risk and as supplement of the local treatments of vulvo-vaginites.

- Natural extracts of Thyme, the selective antibacterial action, fight effectively against itching
- Natural extracts of sage, anti-pruritic and decongestant properties soothe irritation
- physiological pH - soap

**Use:**

Shake before use and close the bottle after each use. 1 to 2 times a day during the time at risk. Can be used in addition to anti fungal treatments. Gently apply the emulsion and rinse thoroughly with clean water.
