Description

Description:

Sensilab Cerin Acne prone Skin Gel provides a rapid solution. Vitamin B3 penetrates deep into the acne, dries it out and prevents new acne breakouts. It soothes the irritated spot, reduces skin blemishes, while the acne dries out rapidly. The gel is quickly absorbable and thus enables an immediate application of make-up. Dermatologically tested.

Use:

Apply directly onto the acne. Recommended evening application for active treatment throughout the night. Apply again in the morning and during the day to dry out acne quicker. It also suitable for the back, shoulders and the cleavage.
