Description

Description:

Sesderma Acglicolic 20 Moisturizing Cream SPF15 contains liposomal glycolic acid, which fights signs of aging. It is recommended for people with dry skin and accustomed to glycolic acid. It can be used even for younger skins.

Characteristics

With an extremely high penetration level, Sesderma Acglicolic 20 Moisturizing Cream SPF15 has deep antioxidant and regenerating action, thanks mainly to Ergothioneine liposomes and plant stem cells present in its formulation.

Its combination of ingredients provides a great reduction of signs of aging and has a balanced pH, which is tolerated by all skin types.

It is the first range of rejuvenating products containing liposomal glycolic acid.

It contains free and liposomal glycolic acid (12%).

Sesderma Acglicolic 20 Moisturizing Cream SPF15

It contains Ergothioneine, vitamins C, E, and F and Eryngium maritimum stem cell, which have regenerative and protective action to the skin. It contains hyaluronic and boswellic acids, and milk protein, improving elasticity and giving soothing effect to the skin. It has also sun protection SPF15.

How to use:

Sesderma Acglicolic 20 Moisturizing Cream SPF 15 should be applied morning and evening, with gentle massage on the face until the product is completely absorbed.
