Description

Description:

Sesderma Hidraderm Hyal Facial Cream is formulated with three different types of Hyaluronic Acid, all of varying weights, to combat skin ageing and dehydration from the surface down to the lower layers of the skin. Ideal for use alongside an intensive Retinoid-based regime to combat peeling or following an in-clinic procedure, this moisturiser also leaves an invisible film over the surface of the skin to prevent water loss and environmental damage throughout the day.

Suitable for all skin types.

Use:

Apply to the skin of the face 2 times a day, by gently massaging with fingertips until completely absorbed.
