Description

Description:

Nuxe Sun Fondant Cream For Face SPF 50 is a high sun protection with a summery fragrance that guarantees a 100% natural and glamorous tan.

It protects from UVA and UVB, premature cutaneous photoaging, limits the apparition of marks, moisturizes thanks to the Water Hyacinth and soothes thanks to Kau Pe Flower. The skin is protected, the tan durably sublimated. Photostable. Alcohol-free. Non-comedogenic. Paraben-free.

Use:

Apply liberally before 30 minutes of sun exposure.

Reapply frequently, especially after swimming or towel-drying the skin. Applying an insufficient amount of product will significantly reduce the level of sun protection.
