### Description

**Description:**

Swisscare Self Tanner Non-sunless Bronzing Cream is suitable for natural tanning and also provides anti-aging skin care.

Tans the skin, nourishes skin, moisturizes and takes an active role in skin protection. Protect skin from signs of aging

- Helps healthy tan by nourishing the skin.
- It has an enhanced content with organic DHA molecules and helps to maintain the vitamins and minerals needed for the skin.
- It contains PhytoCell, one of the most effective technologies for maintaining skin characteristics and effective in protecting skin from UV

damage.

- It is designed as safer, effective and highly protected sunless tanning product.
- While protecting the skin against aging, it activates natural production and provides a long-lasting natural tan.

### Use:

- The sunless tanning lotion should be absorbed by the skin by crawling on each area of your body equally with circular movements. Do clean skin application.
- The more cream is used, the darker the color of the skin. Do not sunbathe more than once a day for a healthy tan and do not spend more than an hour under the sun.
- Wash your hands after application and do not dress until you are dry.
