Description

Description:

The small blow-styling hairbrush from Tangle Teezer is the innovative hairbrush which takes hair from wet to dry. With ground-breaking teeth technology, the Blow-Styling Round Tool picks up hair at the root for great lift and volume. Delivering free flow tension, the hair snakes through the tool with no pulling or tugging and there's no need to roll or wrap the hair around it. Taking excess water away for a faster drying time and a gentle blow-dry, the hair is left with natural volume, bounce, all-over smoothness and shine. So good, there's no need for straighteners or tongs either. The large Blow-Styling Round Tool is best suited for medium to long hair lengths.
