Description

Description:

The half size blow-drying hairbrush from Tangle Teezer is the innovative hairbrush which takes hair from wet to dry. With ground-breaking teeth technology, the Blow-Styling Smoothing Tool has fixed base teeth with built in tension and slight flexibility at the tips. Delivering flow tension, the teeth allows the hair to snake through for a quick, smooth and gentle blow-dry without pulling or stretch-drying. Taking excess water away from the hair for a faster drying time, the hair is left voluminous and shiny with reduced frizz. There's no need for straightening irons. The half size Blow-Styling Tool is best suited for short to medium hair lengths.
