### Description

**Description:**

For most knee conditions, it's integral that you compress the area to reduce pain and stabilise the joint. The Thuasne Genuextrem Knee Support provides firm compression of around 28mmHg. This ensures your knee remains supported throughout use.

**Features:**

- Premium knee sleeve provides good proprioceptive support
- Has additional flexible stays for further immobilisation
- Support is soft against your skin for added comfort
- Provides support and compression
- Flexible lateral stays for additional reinforcement
- Anatomically-shaped elastic knit weave
- Support provides optimal thigh, calf and popliteal comfort

- Lateral silicone anti-slip system for better hold
- Patented pull tabs for easy application and removal
- Provides compression of around 28mmHg
- Available in six different sizes

**Size measurement:**

To find out which size will provide you with the best support and compression, measure the circumference of your knee in the middle of the patella with your leg slightly bent. The Genuextrem Knee Support is available in six different sizes for a more personalised fit. Getting the right fit is vital for compressing the knee so it's important that you get the correct size.
