### Description

**Description:**

Genuimmo 20 ° is an orthosis that serves to immobilize the knee in slight flexion . Used as a Zimmer splint in the treatment of orthopedic conditions and post-surgical immobilization.

**Indication:**

- Emergency immobilization after knee injury with or without fracture.
- Ligamentous lesions of the knee: severe sprain (LCA - LCP) pre or post-surgical, sprain benign (LLI - LLE).
- Progressive push of osteoarthritis and arthritis.
- Meniscal nonsurgical lesion.

**Features:**

- Immobilisation provided by 3 radio-transparent conformable stays

- Anatomical fit thanks to 4 separate height-adjustable straps
- Comfortable with its wide openings and folding central panel
- Easy to use: fitting guidance. Easy access to the knee for treatments

**Size indication:**

Measure the thigh circumference at the strongest
