Description

Description:

Clavicle fractures are all too common and affect a number of people, including children. The Thuasne Ligaflex Clavicular Straps have been designed to support your child's clavicle and the surrounding area following a fracture to speed up their recovery. Its straps can also be used for correcting postural problems as they help immobilise the upper back.

Features:

- Trimnable straps accommodate child's size
- Helps immobilise your child's clavicle after sustaining a fracture
- Straps provide secure immobilisation
- Pad helps protect child against chafing or irritation
- Ideal for treating clavicle fractures and postural problems
- Fastens with articulating buckles for ease of use

Thuasne Junior Ligaflex Clavicular Straps

- Articulating buckles for an anatomical fit
- Buckles provide a custom fit
- Dorsal foam anchoring pad for optimal comfort
- Available in one size to fit most children

Size indication:

As the Ligaflex Junior Clavicular Support has a cutting system that allows you to cut the straps to size, this ensures your child's clavicle is immobilised securely. The brace's Velcro fitting system also makes the support more secure and adjustable, and can be fitted easily. As the straps have been created with articulating buckles, it also fits to your child's anatomy to ensure the product remains as effective as possible.
