Description

Description:

Oedema is uncomfortable in any area of the body, but when it's localised to your ankle this can make putting your shoes on difficult. The Thuasne Ligacast Ankle Brace With Air Pads is a support that provides you with firm stabilisation and can be worn in your shoe. Its inflatable air inserts enable snug contact around the ankle while the air circulating inside the pads produce a massaging effect to reduce oedema.

Features:

- Ankle stirrup splint with inflatable insert
- Provides firm support to the ankle
- Has two rigid side shells
- Inflatable inserts provide you with anatomical fit
- Velcro straps to accurately adjust support's tightness
- Air circulating inside pads provide massaging effect

Thuasne Ligacast Air+ Ankle Splint

- Helps to reduce oedema
- Separate inflator bulb to adjust air pressure once brace is fitted
- Comes in a single size and can be used on either ankle
