Description

Description:

Clavicle fractures are all too common and affect a number of people, from athletes to the elderly. The Thuasne Ligaflex Clavicular Straps have been designed to support your clavicle and the surrounding area following a fracture to speed up your recovery. Its straps can also be used for correcting postural problems as it helps immobilise your upper back.

Features:

- Clavicular straps provide secure immobilisation
- Helps immobilise your clavicle after sustaining a fracture
- Cutting system allows support to be adjusted to your size
- Dorsal foam anchoring pad for optimum comfort
- Pad helps protect you against chafing or irritation
- Ideal for treating clavicle fractures and postural problems

Thuasne Ligaflex Clavicular Straps

- Fastens with a articulating buckles for ease of use
- Buckles allow for an anatomical fit
- Can easily be worn underneath your clothes
- Velcro fitting system is adjustable and secure
- Available in one universal size to fit most users

Adjustable Size

As the Ligaflex Clavicular Support has a cutting system that allows you to adjust the straps to size, this ensures your clavicle is immobilised securely. Its Velcro fitting system also makes the support more secure and adjustable, and can be fitted easily. Designed with articulating buckles, the Thuasne Clavicular Straps help provide you with an anatomical fit.
