Description

Description:

The knee immobilizer Ligaflex Immo 0° is used for the postoperative immobilization of the knee . The hook-and-loop fasteners and radiolucent whales provide a firm hold of the knee in extension .

Indication:

- Immobilization ensured by 3 conformable and radio-transparent whales
- Anti-slip device and tightening straps to hold the splint on the leg

Features:

- Immobilisation provided by 3 radio-transparent conformable stays
- Anatomical fit thanks to 4 separate height-adjustable straps
- Comfortable with its wide openings and folding central panel

Thuasne Ligaflex Immo 0° Knee Splint

-Easy to use: fitting guidance. Easy access to the knee for treatments

Size indication:

Measure the circumference of the thigh at the highest
