Description

Description:

Suffering from thumb pain can be difficult to deal with, particularly because you use your thumb so frequently during day-to-day activities. The Thuasne Ligaflex Rhizo Thumb Support uses a patented wire thumb frame to immobilise your wrist joint. The support maintains your wrist range of motion and allows grip movement to ensure your movement isn't inhibited.

Features:

- Patented wire thumb frame immobilises thumb joint
- Maintains wrist range of motion and allows grip movement
- Opening at thumb column prevents pressure
- Lightweight and comfortable 3D knit fabric
- Antibacterial 3D knit for effective moisture wicking
- Available in two different left and right models

Size measurement:

The Thuasne Thumb Support is available in two sizes so you can get the correct stabilisation. Simply measure the circumference of your wrist and consult the table below to find the correct size for you. The brace also has two different left and right models for a more intuitive support.
