Description

Description:

The Ligastrap Malleo is an ankle brace that provides reinforcement of the lateral ligaments thanks to the elastic compressive knit of around 27.5 mmHg and double strapping. A removable strap provides additional reinforcement and places the foot in a slight eversion. Minimum thickness and velcro attachment ensure a comfortable fit and the Ligastrap Malleo has an anti-slip system on the calf for a better hold.

Features:

- Compressive Knit 27.5 mmHg
- Anti-slip System
- Double Strapping
- Additional Strap

Size indication:

Thuasne Ligastrap Malleo Ankle Brace

The Malleoaction Ankle Support is available in five different sizes. To find out which will provide you with the most comfort and support, measure the circumference of your ankle above the malleolus
