Description

Description:

Dorsal-lumbar support thanks to its 35 cm to 40 cm dorsal height. As the Lombax High Support uses Lombax fabric, it provides you with high elastic compression to prevent instability and discomfort in the region. This makes the brace perfect for when you've recently had surgery in the area and need additional support while you recover. The support can also be used for those who are suffering from acute lower back pain.

Features:

- Dorsal-lumbar support as a result of its 35cm to 40cm dorsal height
- Adjustable tightening as a result of its additional rear-front-related straps
- High elastic compression due to the Lombax fabric
- Easy to put on with a two-part rear closure
- Double strapping to keep you feeling supported
- Has Velcro straps so support is easy to adjust

Thuasne Lombax High Belt

- Stylish grey and blue design
- Adjustable fit makes support suitable for both men and women
- Available in six different sizes so you can find your right fit
