Description

Description:

The application of PediPro silicone heel inserts or shoe insoles is the ideal choice to divide pressure and load evenly. Flexible anatomically-shaped inserts provide better comfort in the area of the heel spur, provide shock-absorbing and decrease the chance of microtraumas.

Features:

- Shock-absorbing and shock-distributing characteristics by using very high-quality silicone for the insert.
- Blue anatomical inserts providing a more gentle comfort feeling of the heel spur (PediPro Plus heel inserts), or for the heel and metatarsals (PediPro Plus insoles).
- Cambrelle/Amicor™ anti-bacterial surface guaranteeing hygienic freshness and comfort (PediPro Plus).
- Self adhesive system that helps them to stay in place for the optimum closing of the shoe (only heel inserts). Ventilation channels guaranteeing better air supply (PediPro).
