Description

Description:

The application of PediPro Softer Silicone heel inserts is the ideal choice to devide pressure and load evenly. Flexible anatomically-shaped inserts provide better comfort in the area of the heel spur, provide shock-absorbing and decrease the chance of microtraumas.

Features:

- Shock-absorbing and shock-distributing characteristics by using very high-quality silicone for the insert.
- Two anatomical inserts which need to be placed in the therefore designed hollow fold:

- Anise-green anatomical inserters providing a more gentile comfort feeling, specially designed for heel spurs,
- Blue anatomical inserts which are softer to your foot and designed for healthy feet or other pathologies.

-Cambrelle/Amicor™ anti-bacterial surface guaranteeing hygienic freshness and comfort.

Thuasne Pedipro Softer Inserts

- Wide edge with self adhesive system that helps them to stay in place for the optimum closing of the shoe (only heel inserts).
- Ventilation channels guaranteeing better air supply.

Size indication.
