Description

Uriage Depiderm Anti-Brown Targeted Care is a care that allows to correct the localized skin pigmentation's. An ultra concentrated care that effectively corrects hyper-pigmentation and brown spots. Also ultra concentrated in anti-brown spot active ingredients to effectively correct local brown spots by greatly reducing their size and intensity.

Infused with Uriage Thermal Water, which moisturizes the skin and preserves the cutaneous barrier, this formula also contains AHAs, active ingredients that exfoliate the skin in order to shed hyper-pigmented epidermal cells. Brown spots are significantly reduced in size and intensity, while the skin is given a soft and supple finish.

Uriage Depiderm Anti-Brown Targeted Care is indeed the perfect for use on the face, hands and cleavage.

Main Ingredients :

- AHAs gently exfoliate the skin, boosting the shedding of hyperpigmented epidermal cells.
- Uriage Thermal Water, which is pure and naturally rich in mineral salts and trace elements, soothes the skin and relieves sensations of discomfort.

How to use :

Apply directly to brown spots on the face, décolleté and hands. Avoid the eye contour area. In cases of sun exposure, protect the skin with a very high sun protection product.
