Revolution Safran:
Proven clinically:

- 84% reduction in sensation of hunger
- 78% reduction of sugar cravings
- Up to 6 cm loss from thigh area
- Promotes weight loss by decreasing snacking and by improvement of emotional well-being.

Global innovation:

2 years of research have led to the discovery of Satireal, the active weight loss ingredient for Saffron.

1. Action occurs on stress and eating behavior

Stress affects how much food we consume. It is usually translated by compulsive snacking. This phenomenon induces weight gain that the subject wants to stop by imposing dietary restrictions, which are additional sources of stress.

Saffron improves the mental state and has a satiety effect. It controls and reduces sugar cravings and compulsive nibbling, which leads to and reduces hunger, which creates a real feeling of satiety. Satireal, the active ingredient in Saffron, has a direct effect on serotonin. It can

2. Proven effectiveness:

Inhibits serotonin reuptake inhibitors (SSRIs), and improves the emotional well being
Exerts a satiety feeling

Usage:

1 tablet per day before lunch , improves the emotional well-being, exerts a satiety effect, decreases compulsive snacking, and promotes slimming
