Description

Description:

Native to North America and Canada, the cranberry (also called highbush cranberry or lingonberry) is a small red berry, popular in food for its bitter and tart taste.

Indeed, the cranberry is distinct from other berries by its exceptional content of flavonoids, particularly proanthocyanidins. It promotes a good urinary function.

Use:

Treatment program: 10 days
take 2 capsules morning and evening with a large glass of water.

Maintenance program: 20 days
take 1 hard capsule morning and evening with a large glass of water.

In addition, drink plenty of water throughout the day (1.5 L) to promote proper elimination.
