Description

**Description:**

Zwitsal Zinc Ointment contains panthenol, zinc and a drop of calendula, which helps to protect red buttocks and provide immediate relief. Zinc oxide helps soothe diaper rash quickly. Panthenol ensures that the skin barrier is strengthened. In addition, the ointment contains calendula, an ingredient known for its soothing effect.

Fragrance free

pH neutralizing

Paraben free

Dermatologically tested

Mild

Hypoallergenic

**Use:**

After cleaning, coat the baby's bottoms with a thin layer of zinc ointment. This helps to prevent diaper rash and to repair damaged skin. Use it if your baby suffers quickly from red buttocks or diaper rash. The greasing really does not need any cleaning and it is not a disaster if you forget it once, but it is good to do it regularly.
